

Aakash Tools Co. 98241 51444 / 71444 / 91444

Materials	Grade
Aluminum	T01
General	T25G / T22G
Casting	T15C / T15CH
Steel	T25S / T15S / T05S / T25SH
Stainless Steel	T05SS / T20SS
Cermet	T30 / T25
High Precision	T25H / T20H

T25H is the Premium Grade Suitable for all kind material. It have good versatility & preferred in interrupted as well as free cutting Machine Component for for all kind of material like Cast Iron, Steel FORGING, as well stainless steel for EXCELLENT Result Machining. This is a Allrounder Grade.

T20H is Excellent Grade Suitable for all material. It has excellent Results for all type machining Application for Roughing & Finishing for Cast iron, Steel & stainless steel.

T15CH is optimized for good wear resistance, toughness and performed excellently in interrupted for CAST IRON Machining. It is also suitable for tougher Casting with excellent Result requirements.

T15C is optimized for good for Genral wear resistance, toughness and performed good for CAST IRON Machining. It is good for free cuting of Casting with excellent Result.

T25SH is optimized for impact resistance and wearing resistance, suitable for Stainless steel for rough cutting in continuous and interrupted. It can realize high-speed, high-efficiency and environmental cutting.

T25S is for interrupted as well as difficult machining grade for semi finishing & finishing for Steel Machining.

T15S is for smooth free cutting excellent result machining grade for semi finishing and finishing all material

T05S is for all Tough machining grade for Heavy Roughing & semi finishing for Steel Forging & General Machining.

T05SS is suitable for Stainless steel material cutting for the purpose of Light roughing and Semi finishing.

T20SS is optimized for the best combination of toughness and wearing resistance. It is wide range applicative and suitable for Stainless steel and finishing ISO material.

T25G is high hardness and excellent versatility with good free cutting material for roughing and well as for finishing. This Grade is having excellent result in Grooving Inserts & Threading inserts.

T22G is highly hard substrate combines both favorable shock resistances and blade security. Used PVD coating with excellent versatility, it is preferred in interrupted turning and milling stainless steel.

T30 is Cermet Inserts Suitable for free cutting Material Specially for Finishing.

T25 is Cermet Inserts Suitable for all type of Material Specially for Precision Finishing.

T01 Best Suitable Grade in all kind of NON Ferrous material for excellent Machining for Free cutting. For Super Mirror finishing in Aluminum, Brass, Copper as well as other Soft material.
